## Professional Summary

---

Software Engineer with 4+ years building and shipping production-grade backend systems using Java, Spring Boot, and React. Delivered a full-stack, multi-role SaaS platform handling payments, scheduling, and automated workflows — independently owning design, development, and deployment.

## Work Experience

---

**Software Developer**, Deltafixes Technologies LLP – Ahmedabad, Gujarat 07/2022 – Present

- Developed and maintained backend-focused enterprise web applications using Java, Spring Boot, JPA, MySQL, Redis, and React, following Agile/Scrum practices in a collaborative team environment.
- Designed and implemented **40+ REST APIs** supporting authentication, scheduling, notifications, and user management.
- Integrated third-party services such as MailerLite, Google Calendar, Google Meet, and Zoho CRM for automated workflows.
- Implemented security measures including input sanitization, rate limiting, JWT-based authentication, and token blacklisting.
- Developed Redis-backed OTP authentication for login, registration, and password reset with configurable expiration and retry limits.
- Implemented OAuth 2.0 based Single Sign-On (SSO) with Google, LinkedIn, and other social identity providers for seamless authentication.
- Improved API response time by **35%** using Redis caching and optimized SQL queries, and Kafka-based background processing.

**Programmer Analyst Trainee**, Meditab Software – Ahmedabad, Gujarat 01/2022 – 03/2022

- Developed REST APIs for healthcare systems using .NET and PostgreSQL, supporting internal hospital workflows.
- Designed relational database schemas with proper normalization, constraints, and indexing to ensure data integrity.

## Projects

---

### Immigration Questions

- Led end-to-end development of a production-grade immigration management platform from design to deployment.
- Designed and developed scalable REST APIs using Spring Boot and JPA for user onboarding, question management, lead creation, automated lead assignment, scheduling, and notifications.
- Built and maintained multiple role-based portals (Admin, Attorney, Client) using React and modern frontend technologies.
- Implemented secure Stripe-based payment integration with role-specific subscription plans, secure checkout, and subscription renewal workflows.
- Improved system performance and scalability by implementing asynchronous processing using Apache Kafka for event-driven communication between services.
- Developed background jobs, push notification systems, and document generation using JasperReports.
- Leveraged AI-assisted development tools (GitHub Copilot and Cursor) to accelerate development, reduce boilerplate code, and improve productivity across API development, debugging, and refactoring tasks.
- Tech stack: Spring Boot, Spring Security, JPA, React, Redis, Apache Kafka, JasperReports, Bootstrap, Expo

### My Law Service

- Developed REST APIs using Spring MVC and Hibernate for a legal services platform.

- Built server-side rendered UI using JSP and jQuery.
- Refactored legacy codebase, fixed bugs, and improved maintainability after understanding existing system flow.
- Optimized complex data-sharing APIs using query tuning and pagination, reducing load time by 40%.
- Tech stack: Spring MVC, Hibernate, JSP, MySQL

## Technical Skills

---

**Languages:** Java, JavaScript

**Frameworks/Libraries:** Spring Boot, Spring MVC, Hibernate, JPA, React, JUnit

**Frontend:** HTML, JSP, jQuery

**Backend:** REST APIs, Microservices, Servlets, Redis, JasperReports, Gradle

**DevOps:** Docker, AWS, Git, Bitbucket, CI/CD, Bitbucket Pipelines, Github

**AI Tools:** GitHub Copilot, Cursor

## Education

---

**Marwadi Education Foundation's Group of Institutions**, BE in Information Technology

07/2018 – 06/2022

- CGPA: 8.68 / 10

## Certifications

---

- Oracle Cloud Native Developer (Nov 2025)
- Oracle Java Foundations (Oct 2025)
- Introduction to Database and SQL Querying (May 2024)
- Mastering Data Structures with Java (Nov 2023)
- JSP, Servlets and JDBC (Aug 2022)
